FALL 2021

---

To better accommodate the future needs and scalability of our group, MiHSEF has decided to migrate from our homebrew platform used during the last school year to one backed by a team of dedicated developers that many other state leagues have also begun using. While this may feel like a small step backward at the start, the long term prospects open up a lot of possibilities and ensure we can dedicate our resources to benefit the students more directly.

For the 21-22 school year, MiHSEF has partnered with UGC to utilize their platform in the operations of the League. Their platform has very similar functionality to what we used last year and has a very impressive roadmap that will help us all run our teams and competitions smoother and faster. UGC mirrors our own beliefs regarding data privacy and will not share or use any data with anyone outside our League.

Due to this change, teams that competed last year will need to re-register for this year.
